

!!!! IMPORTANT ATTENTION WHEN INSTALLING VIDEO WALL!!!!

1. [vertically] Make sure the LCD is **NOT** put on the top of the pedestal or another LCD directly. As this may cause damage to the LCD due to gravity (0.2~0.5mm is fine):

2. [horizontally] Keep every LCD away from each other to prevent damage caused by pressure due to tiny expansion when temperature changes (0.2mm ~ 0.5mm is fine):

3. For instructions to adjust the horizontal and vertical gap between LCDs, please contact Dahua technical team to get installation video.
